Paul’s Letter to the Pope – In will of the Church and People
By Shomit Sirohi

I. In fact economics and anthropology of Life is the signal of Good Life

In fact the principles of Life upheld, that Christ is organizing a Church life in his house which then is him celebrating with Spring Onion his best lunch – but all as if his alienation is then covered over by the Gospel of St. Matthew as in fact the Apostles working for the Church and his Life as collective spirit – this then is how to lead a modern Prophetic life – that my work is that of all – in the past he met at a Collective Hall in Hyderabad.

II. Church Life Letters by Paul followed as Hall to Meet perhaps for Pope who resists this law of the Militant Bible for a simple visit to his house or by ordained proof of his ideas of a simple life by Curation instead.

Church life is simply the organisation of a law – the law of organizing by letter all things – I send a letter to the people to come and be here in the sense of Deterior capitalism and parish and mass which then is convened in good Spirit in the line of curation each Sunday at Church – all of them are called – Only the Testament is at work – my work is Church life is Priest’s and Reverend’s profession, and then the mass will speak its letter – the invitation of Paul is actually a mass line.

“Inspired by Christ and joined in letter,

I believe this is a mass,

Each Sunday.

Each of that day for the year or for l’avenir.”

This word is then Poulantzas – forecasting an election of the Christians in India and all true people of the world to join the Pope for a mass line.
